

To deeply understand global macroeconomy trends and the changing dynamics in lead and zinc industry, so as to seize the development opportunities and promote the high-quality development of the industry, the 2026 China International Lead and Zinc Week will be held in November 3-5 in Dongguan city, Guangdong province.

China's lead and zinc industry is going through a critical transition period characterized by structural adjustment and reshaping of supply and demand. With the theme of "New-Quality Empowerment, Resilient Coexistence-Strengthening the Foundation of Strategic Industries", the annual meeting will focus on strategic transformation of resources and the demand of industrial upgrading, as well as industrial chain collaboration, technological innovation, emerging applications, strategic metal recycling, and comprehensive resource utilization. The goal is to unite the industry, strengthen the foundation of national strategic industries, and promote the high-quality development of the lead and zinc industry.

Time: November 3-5

Place: Regal Palace Hotel

Contact: Ms. Xie Xuhang    [xiexuhang@antaike.com](mailto:xiexuhang@antaike.com)
